Add Security-TAK.dll to your project. Here's an example:

Rajoutez Security-TAK.dll à votre projet. Voici un exemple :

C#.Net :

```csharp
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using Security_TAK;

namespace ConsoleApplication1
{
    class Program
    {
        static void Main(string[] args)
        {
            string toConvert = "A";
            string takResult;

            takResult = TAK.convertToTak(toConvert);

            Console.WriteLine(takResult);
        }
    }
}
```

Vb.Net :

```vbnet
Imports Security_TAK.TAK

Module Module1

    Sub Main()

        Dim toConvert As String = "A"
        Dim takResult As String

        takResult = convertToTak(toConvert)

        Console.WriteLine(takResult)
        Console.Read()

    End Sub

End Module
```
